

SAB 150

fully automatic BLOCK packaging machine

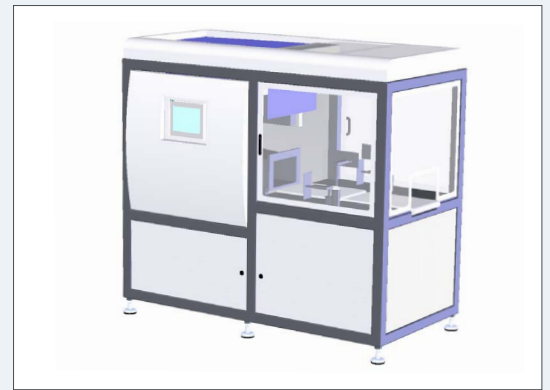

As a convincing service provider we provide you with thorough advice and service – before and during the order processing and beyond this, with a reliable after sales service.

Design, function and handling answer to the state of the art in technology.

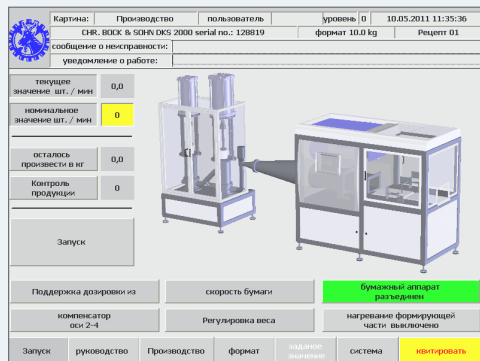

1 range of application

Fully automatic packaging machine for butter, margarine and other edible fats, as well as other comparable products of especially soft consistencies and various sizes for further industrial processing. The SAB 150 is the perfect machine for packaging blocks of larger scale. The system is especially tailored to process products between 10 and 25kg and was reduced down to the essential elements.

This block packaging machine is optimized in design and function to meet the highest standards of packaging quality and process reliability.

2 ‚BOCK-TOUCH‘ system

Exclusively for our machines

The ‚BOCK-TOUCH‘ system controls your packaging plant via touch panel according to recipes, allowing reproducible results at any time.

Speed, temperatures, cycle times and other parameters relevant to the particular product in process are adapted automatically. The immediate fault analysis via online – teleservice provides perfect conditions for a maximum capacity production.

3 function

The feed in of the product is realized in a hygienically closed system by one of our dosing units. Through processing of the product in idleness, real resting phases are realized, guaranteeing a high plasticity unreachd by continually running systems.

A long inlet cone and heated extruding mouthpiece ensure gentle product infeed and accurate shape. The product cutter guarantees an extreme smooth cut during idle product flow with absolute shape accuracy. Horizontal product infeed and extrusion of blocks. „U“ shaped wrapping of the blocks followed by sideway folding through folding units complete the packaging procedure on the highest level of quality.

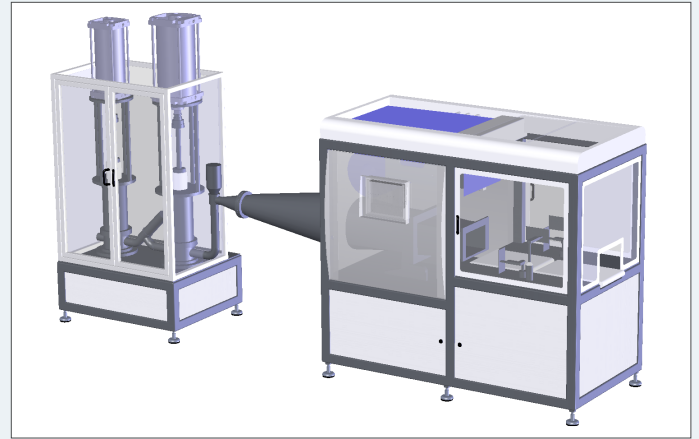

4 technical details

SAB 150 fully automatic block packaging machine

range of size:	10 - 25 kg
max. performance:	7,5 t/h
packaging material:	min. 60 g/m ²
energy consumption:	7,4 kW in total
weight of machine:	2,5 t
handling:	line supervision (1 person)

5 advantages

clear advantages ...

- robust and compact design
- intuitive operation via 12" color touch screen
- high output with highest weight precision
- excellent accessibility to all areas
- hygienically encapsulated packaging area
- water tempering for extrusion unit
- manufactured completely from stainless steel
- meets highest hygienic standards
- ‚Bock mood-line‘ optical signal
- teleservice

6 accessories

... and everything that goes with it

- block precutting unit
- paper reel transporter with lift function
- check weigher
- CIP-cleaning system
- resting tubes in various formats
- resting tube heating system
- sieve and hole discs

further accessories available
